

GLOW

GHK-cu (the copper peptide) BPC-157 TB-500

WHAT IS IT?

Multi peptide blend that combines three peptides into a single formulation. Often described as the Wolverine Blend plus GHK-cu, adding a stronger focus on collagen support, skin health and healthy aging.

GHK-Cu - supports collagen production, tissue remodeling and skin health.

BPC-157 - tissue repair, recovery and gut health

TB 500 - supports cellular migration, recovery and tissue regeneration

BENEFITS

- supports collagen and elastin production
- promotes skin firmness and texture
- may improve overall skin quality and radiance
- promotes healthy tissue repair and remodeling
- supports tendon, ligament and muscle recovery
- helps maintain healthy connective tissue
- supports overall vitality and resilience

TIMELINE

Weeks 1-2

- Early recovery support

Weeks 3-4

- skin may appear smoother and more radiant
- ongoing tissue repair and recovery support

Weeks 5-8+

- ongoing collagen support for skin quality
